# DIGITAL PRINTING

Experience accurate and rapid graphics with Stahlin's new digital printing capabilities.

**1,200 DPI**

**UV stabilized ink**

**Exact color matching - RAL & Patone**

**Cost effective solution to expensive placards**

HIGH VOLTAGE
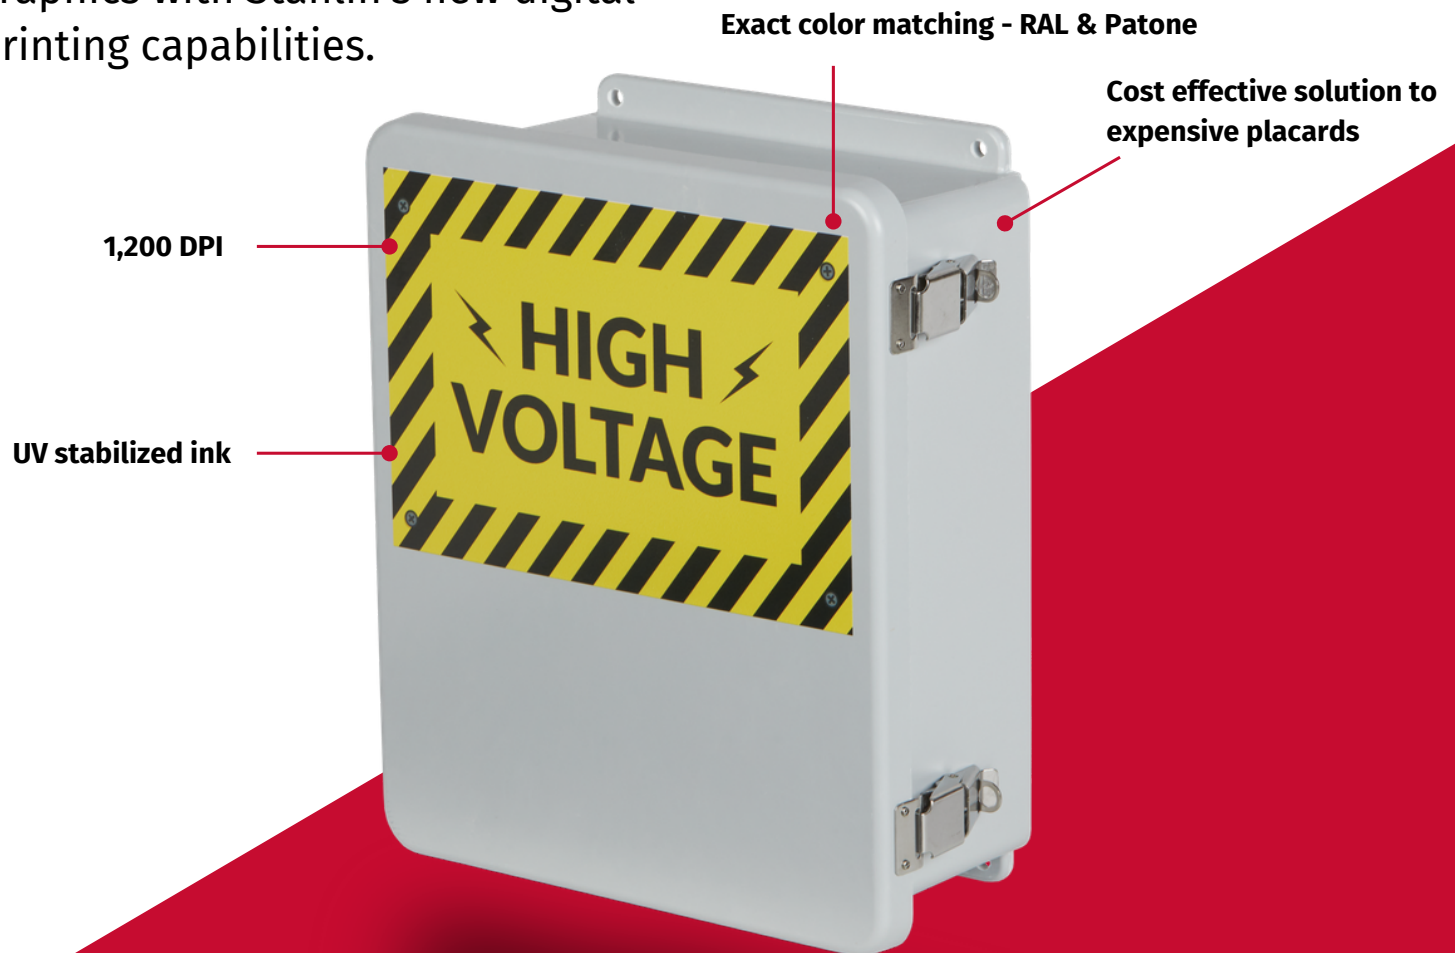

**The future of enclosure graphics is here. Designed to be vibrant and long-lasting.**

STAHLIN
A **ROBROY** ENCLOSURES® BRAND

# Take your design to the next level!

## Available on ALL covers up to 48 X 36

Preferred files types: .pdf, .ai, and .eps

- → Logos
- → Warning Labels
- → Instructions
- → QR Codes
- → Safety Information
- → User Diagrams

## Printing Quality to Match Your Enclosure

- → 1,200 DPI Quality
- → Quick Turnaround Time
- → Exact Color Matching - RAL & Patone

Color gradients & transitions

Ink is UV stabilized for sun exposure. 2500 hour accelerated UV testing results outperformed traditional silk screen in color degradation. Life expectancy will depend greatly on environment, application, and direct sunlight exposure.

Meets or exceeds ASTM cross hatch test standards for proper adhesion of paints to a substrate.
